

A graduate project or internship requires a special permit to register. In order to obtain a special permit, you need to select a project advisor and write a proposal and submit it to the program director through email. Your project proposal will be reviewed and approved by the graduate committee with their suggestions and improvements if needed. Once the project proposal is approved, then you will receive an email from Mary Hackley with a special permit code to register for the project or internship.

The deadline for submitting a project or an internship proposal for fall 2010 is August 25th.

Note that all graduate students in M.S (CS) program are required to satisfy either a project or a thesis option as described in the graduate catalog.

A project proposal form can be obtained at

<http://www.towson.edu/~karne/msprog/proposal.docx>.
